Office Action Summary

This Office Action is in response to the amendment filed 2/27/03.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office Action.

This application contains claims 45-49, 68, 71, and 73 drawn to an invention nonelected with traverse in the amendment filed 11/22/02 in response to a telephone conference on 11/20/02. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

The formal drawings filed 2/27/03 are acceptable.

The rejection of claims 40, 42, 44, and 82-86 under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention is withdrawn in view of the amendment.

The rejection of claims 40, 42, 44, and 82-86 under 35 U.S.C. 101 because the claimed invention is not supported by either a

credible asserted utility or a well established utility is maintained.

Applicant's arguments have been fully considered but are not deemed to be persuasive. Applicant argues that the claimed compositions have been effective in treating the effects of HIV infection, including weight loss, KS lesions, and CD4⁺ T cell counts. Applicant further argues that applicants have provided sufficient tests results in the present application to show the efficacy of the claimed composition and methods in humans and animal models with reference to pages 145-152 of the instant specification with the assertion that the compositions of the present invention were tested on SIV infected monkeys and humans infected with HIV. This is not persuasive because the disclosure is not commensurate with the claimed invention. The claims are directed to compositions comprising various fractions purified from hCG containing samples. The specification teaches using hCG in various treatments. The best that can be determined from the disclosure is that hCG has some efficacy. The part of the specification cited only teaches hCG, not the claimed fractions. Assuming, *arguendo*, that β hCG or some fraction has some efficacy for treating the effects of HIV infection, claim 42 is directed a composition "effective in the treatment of HIV infection" which is contrary to applicant's arguments that the claims are directed to

treating the effects of HIV infection rather than HIV infection, per se. Therefore, the rejection is maintained.

The rejection of claims 40, 42, 44, and 82-86 under 35 U.S.C. 112, first paragraph. Specifically, since the claimed invention is not supported by either a credible asserted utility or a well established utility for the reasons set forth above, one skilled in the art clearly would not know how to use the claimed invention is maintained.

Applicant's arguments are not persuasive for the reasons set forth above.

The rejection of claims 40, 42, 44, and 82-86 are rejected under 35 U.S.C. §112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention is maintained.

Applicant's arguments are not persuasive for the reasons set forth above.

The rejection of claims 40, 42-44, and 82-86 are rejected under 35 U.S.C. 112, first paragraph, because the specification,

5

while being enabling for the composition extracted from urine, does not reasonably provide enablement for all "native" sources is withdrawn in view of the amendment to the claims.

The following is a new ground of rejection necessitated by applicant's amendment.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 40 and 86 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 40 and 86 are unclear because the language "at least one fraction" must be changed to "more than one fraction" or "at least two" because the composition requires at least hCG (77 kD) or β hCG (10 kD), and have a molecular weight (MW) of 40, 15, or 3 kD which makes for at least two fractions. The fraction can not comprise hCG or β hCG and have a MW or of 40, 15, or 3 kD.

6

The claimed invention is apparently free of the prior art of record.

No claims are allowed.

Applicant's amendment necessitated the new grounds of rejection. Accordingly, **THIS ACTION IS MADE FINAL**. See M.P.E.P. § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
